

## WE ARE HIRING:

# PROTOTYPING TECHNICIAN

If you enjoy working with your hands, building new tech, and crave variety, our engineering R&D company might be right for you. We're looking for a Prototyping Tech to join our team. Help our engineering team with prototype fabrication, testing, assembly, electrical wiring, and cleaning & organizing the Workshop. Go on a [video tour of the Workshop](#).

Benefits package includes healthcare, retirement matching, profit sharing, short-term disability, continuous training & development, flexibility, plus personal use of our sweet prototyping Workshop.

### Typical Responsibilities:

- Manage the Workshop equipment & tools
- Prototype fabrication from engineer's designs
- Provide design input and modify parts for better functionality
- Perform and document prototype testing

### Qualifications:

- High School Degree required, Vocational education desired
- Experience with 3D printing, metalshop tools, CNC machinery desired
- Strong verbal and written communication skills
- Enjoy voiding warranties, DIY projects, & tinkering
- Mechanical & electrical aptitude
- US Citizenship required (NISPOM)

Root3 Labs is an engineering R&D company specializing in the design, research, and development of electromechanical devices for medical device and defense industries. Our expert engineering staff helps device manufacturers and DoD Laboratories turn problems into prototypes and prototypes into finished products. Our facility includes an extensive fabrication workshop to allow quick design-prototype-test cycles using a variety of materials, equipment, and techniques.
